Subject Index

Activation

- Angle-dependent XPS study of the mechanisms of “high–low temperature” activation of GaAs photocathode, X. Du and B. Chang 251 (2005) 267

AES

- Analytical interfacial studies of double carbonate thermionic oxide cathodes over accelerated operational life, D.K. Barber, S.N. Jenkins, M.J. Whiting and M.A. Baker 251 (2005) 42

Ageing process

- Effect of ageing process on performance of molybdenum field emission arrays, X. Li, C. Yang, J. Feng, J. Cai, G. Bai, M. Ding, F. Zhang and F. Liao 251 (2005) 210

Aging

- Aging process of I-cathode with magnetic ion trap, X. Zhang, W. Lei, N. Feng, J. Havekes, L. Tong and D. den Engelsen 251 (2005) 146

AlGaN

- Analysis of the carrier concentration for field emission from $\text{Al}_x\text{Ga}_{1-x}\text{N}$, T. S. Choi and M. S. Chung 251 (2005) 191

Aligned carbon nanotubes

- Fabrications of Spindt-type cathodes with aligned carbon nanotube emitters, M. Q. Ding, X. Li, G. Bai, J. J. Feng, F. Zhang and F. Liao 251 (2005) 201

AlN nanocones

- Synthesis and field emission properties of aluminum nitride nanocones, C. Liu, Z. Hu, Q. Wu, X. Wang, Y. Chen, W. Lin, H. Sang, S. Deng and N. Xu 251 (2005) 220

Aluminum nitride

- Field emission characteristics of oriented-AlN thin film on tungsten tip, S.L. Yue, C.Z. Gu, C.Y. Shi and C.Y. Zhi 251 (2005) 215

Angle-dependent X-ray photoelectron spectroscopy (XPS)

- Angle-dependent XPS study of the mechanisms of “high–low temperature” activation of GaAs photocathode, X. Du and B. Chang 251 (2005) 267

Annealing

- Field emission properties of diamond-like carbon films annealed at different temperatures, J.J. Li, C.Z. Gu, H.Y. Peng, H.H. Wu, W.T. Zheng and Z.S. Jin 251 (2005) 236

Arthur Wehnelt

- Hundred years anniversary of the oxide cathode—A historical review, G. Gaertner and D. den Engelsen 251 (2005) 24

Ba evaporation

- Correlation of cathode parameters of high power grid tubes with material characteristics of cathode-grid units, I. P. Melnikova, I. V. Polyakov and D. A. Usanov 251 (2005) 120

Ba-dispenser cathode

- Life-limiting mechanisms in Ba-oxide, Ba-dispenser and Ba-Scandate cathodes, G. Gaertner and D. Barratt 251 (2005) 73

Ballast resistor

- Effect of ageing process on performance of molybdenum field emission arrays, X. Li, C. Yang, J. Feng, J. Cai, G. Bai, M. Ding, F. Zhang and F. Liao 251 (2005) 210

Base metal

- The base metal of the oxide-coated cathode, F. Poret and J.M. Roquais 251 (2005) 31

Beam focusing

- Cathode units with a carbon fiber field emitter, M. Chupina, O. Ivanov, O. Maslennikov and E. Orekhov 251 (2005) 230

Carbon fiber field emitter

- Cathode units with a carbon fiber field emitter, M. Chupina, O. Ivanov, O. Maslennikov and E. Orekhov 251 (2005) 230

Carbon fibers

- Field emission cathodes based on milled carbon fibers, E.P. Sheshin, A.S. Baturin, K.N. Nikolskiy, R.G. Tchesov and V.B. Sharov 251 (2005) 196

Carbon nanotube emitter

- Fabrication and characterization of high-current-density carbon-nanotube cold cathodes, C. Zhu, C. Lou, W. Lei and X. Zhang 251 (2005) 249

Carbon nanotube field emitter

- Special features of electron sources with CNT field emitter and micro grid, W. Knapp and D. Schleußner 251 (2005) 164

Carbon nanotubes (CNTs)

- Field electron emission from branched nanotubes film, B. Zeng, S. Tian and Z. Yang 251 (2005) 245

Carbon nanotubes

- Electrophoretic deposition and field emission properties of patterned carbon nanotubes, H. Zhao, H. Song, Z. Li, G. Yuan and Y. Jin 251 (2005) 242
New method to fabricate field-emission cathode of carbon nanotubes, C. Lou, X. Zhang, W. Lei and C. Qi 251 (2005) 254
Electron field emission properties of carbon nanotubes-deposited flexible film, H. Ma, L. Zhang, J. Zhang, L. Zhang, N. Yao and B. Zhang 251 (2005) 258

Carbonized cathode

- Emission efficiency optimization of RE_2O_3 doped molybdenum thermionic cathode by application of pattern recognition method, J. Wang, W. Liu, Y. Liu and M. Zhou 251 (2005) 89

Carrier concentration

- Analysis of the carrier concentration for field emission from $\text{Al}_x\text{Ga}_{1-x}\text{N}$, T. S. Choi and M. S. Chung 251 (2005) 191

Cathode life

- Life-limiting mechanisms in Ba-oxide, Ba-dispenser and Ba-Scandate cathodes, G. Gaertner and D. Barratt 251 (2005) 73

Cathode load

- The decline of impregnated cathodes in CRTs, D. den Engelsen and L. Tong 251 (2005) 139

Cathode longevity

- Correlation of cathode parameters of high power grid tubes with material characteristics of cathode-grid units, I. P. Melnikova, I. V. Polyakov and D. A. Usanov 251 (2005) 120

Cathode plasma

- Investigations of the multi-pulsed emission characteristics of velvet, L. Xia, K. Zhang, J. Shi and L. Zhang 251 (2005) 262

Cathode

- Preparation and "in situ" analysis of La coated Mo cathodes, S. Hao, Z. Nie, J. Yang and X. Xi 251 (2005) 97

- Emission and surface characteristic of ternary alloy Ir/Re/W-coated impregnated tungsten cathodes, H. Zhang, Y. Liu, M. Zhang and Y. Li 251 (2005) 130
- Application of vitreous and graphitic large-area carbon surfaces as field-emission cathodes, C. E. Hunt and Y. Wang 251 (2005) 159
- Chemical vapor deposition*
- Enhanced electron emission from diamond film deposited on pre-seeded Si substrate with nanosized diamond power, C.Z. Gu 251 (2005) 225
- Field electron emission from branched nanotubes film, B. Zeng, S. Tian and Z. Yang 251 (2005) 245
- Synthesis and field emission properties of aluminum nitride nanocones, C. Liu, Z. Hu, Q. Wu, X. Wang, Y. Chen, W. Lin, H. Sang, S. Deng and N. Xu 251 (2005) 220
- Child–Langmuir law*
- Two-dimensional Child–Langmuir law of planar diode with finite-radius emitter, Y. Li, H. Wang, C. Liu and J. Sun 251 (2005) 19
- Coherent electron beams*
- Atomic-scale field emitter with self-repairable function and thermodynamically stable structure: FEM study on Pd-covered nanopillars on W<1 1 1> tips, E. Rokuta, T. Itagaki, D. Miura, T. Moriyama, T. Ishikawa, B.-L. Cho, T.Y. Fu, T.T. Tsong and C. Oshima 251 (2005) 205
- Cold cathode*
- Characteristics of a cold cathode electron source combined with secondary electron emission in a FED, W. Lei, X. Zhang, X. Zhou, Z. Zhu, C. Lou and H. Zhao 251 (2005) 170
- Cold cathodes*
- Field emission cathodes based on milled carbon fibers, E.P. Sheshin, A.S. Baturin, K.N. Nikolskiy, R.G. Tchesov and V.B. Sharov 251 (2005) 196
- Current density*
- The decline of impregnated cathodes in CRTs, D. den Engelsen and L. Tong 251 (2005) 139
- dc plasma*
- Fabrications of Spindt-type cathodes with aligned carbon nanotube emitters, M. Q. Ding, X. Li, G. Bai, J. J. Feng, F. Zhang and F. Liao 251 (2005) 201
- Diamond film*
- Enhanced electron emission from diamond film deposited on pre-seeded Si substrate with nanosized diamond power, C.Z. Gu 251 (2005) 225
- Diamond-like carbon films*
- Field emission properties of diamond-like carbon films annealed at different temperatures, J.J. Li, C.Z. Gu, H.Y. Peng, H.H. Wu, W.T. Zheng and Z.S. Jin 251 (2005) 236
- Diffusion*
- The base metal of the oxide-coated cathode, F. Poret and J.M. Roquais 251 (2005) 31
- Model of dopant action in oxide cathodes, D. den Engelsen and G. Gaertner 251 (2005) 50
- Diode assembly*
- Electron field emission properties of carbon nanotubes-deposited flexible film, H. Ma, L. Zhang, J. Zhang, L. Zhang, N. Yao and B. Zhang 251 (2005) 258
- Dispenser cathodes*
- Weld techniques for reservoir cathodes, B. K. Vancil and E. G. Wintucky 251 (2005) 101
- Correlation of cathode parameters of high power grid tubes with material characteristics of cathode-grid units, I. P. Melnikova, I. V. Polyakov and D. A. Usanov 251 (2005) 120
- A new dispenser cathode with dual-layer, Y. Li, H. Zhang, P. Liu and M. Zhang 251 (2005) 126
- Emission and surface characteristic of ternary alloy Ir/Re/W-coated impregnated tungsten cathodes, H. Zhang, Y. Liu, M. Zhang and Y. Li 251 (2005) 130
- Doping*
- Model of dopant action in oxide cathodes, D. den Engelsen and G. Gaertner 251 (2005) 50

- Dual-layer*
- A new dispenser cathode with dual-layer, Y. Li, H. Zhang, P. Liu and M. Zhang 251 (2005) 126
- Electrical conductivity*
- Model of dopant action in oxide cathodes, D. den Engelsen and G. Gaertner 251 (2005) 50
- Electrolysis*
- Model of dopant action in oxide cathodes, D. den Engelsen and G. Gaertner 251 (2005) 50
- The decline of impregnated cathodes in CRTs, D. den Engelsen and L. Tong 251 (2005) 139
- Electron affinity*
- Analysis of the carrier concentration for field emission from $\text{Al}_x\text{Ga}_{1-x}\text{N}$, T. S. Choi and M. S. Chung 251 (2005) 191
- Electron field emission*
- Electron field emission properties of carbon nanotubes-deposited flexible film, H. Ma, L. Zhang, J. Zhang, L. Zhang, N. Yao and B. Zhang 251 (2005) 258
- Electron field emitter*
- Special features of electron sources with CNT field emitter and micro grid, W. Knapp and D. Schleußner 251 (2005) 164
- Electron microscope*
- Cathode units with a carbon fiber field emitter, M. Chupina, O. Ivanov, O. Maslennikov and E. Orekhov 251 (2005) 230
- Electron optics*
- The decline of impregnated cathodes in CRTs, D. den Engelsen and L. Tong 251 (2005) 139
- Electron source*
- Special features of electron sources with CNT field emitter and micro grid, W. Knapp and D. Schleußner 251 (2005) 164
- Electrophoresis*
- Electrophoretic deposition and field emission properties of patterned carbon nanotubes, H. Zhao, H. Song, Z. Li, G. Yuan and Y. Jin 251 (2005) 242
- Electrophoretic deposition*
- Electron field emission properties of carbon nanotubes-deposited flexible film, H. Ma, L. Zhang, J. Zhang, L. Zhang, N. Yao and B. Zhang 251 (2005) 258
- Emission characteristics*
- High current density M-type cathodes for vacuum electron devices, J. Li, Z. Yu, W. Shao, K. Zhang, Y. Gao, H. Yuan, H. Wang, K. Huang, Q. Chen, S. Yan and S. Cai 251 (2005) 151
- Emission current*
- An improved reservoir oxide cathode, X. Wang, X. Liao, J. Luo and Q. Zhao 251 (2005) 69
- Scandate cathode for TWT, W. Shuguang 251 (2005) 114
- Emission properties*
- Operating model for scandia doped matrix scandate cathodes, W. Liu, K. Zhang, Y. Wang, K. Pan, X. Gu, J. Wang, J. Li and M. Zhou 251 (2005) 80
- Emission uniformity*
- Effect of ageing process on performance of molybdenum field emission arrays, X. Li, C. Yang, J. Feng, J. Cai, G. Bai, M. Ding, F. Zhang and F. Liao 251 (2005) 210
- Emitters*
- Fabrications of Spindt-type cathodes with aligned carbon nanotube emitters, M. Q. Ding, X. Li, G. Bai, J. J. Feng, F. Zhang and F. Liao 251 (2005) 201
- Escape probability*
- Angle-dependent XPS study of the mechanisms of "high-low temperature" activation of GaAs photocathode, X. Du and B. Chang 251 (2005) 267

FIB

- Analytical interfacial studies of double carbonate thermionic oxide cathodes over accelerated operational life, D.K. Barber, S.N. Jenkins, M.J. Whiting and M.A. Baker 251 (2005) 42

Field electron nanotips

- Atomic-scale field emitter with self-repairable function and thermodynamically stable structure: FEM study on Pd-covered nanopylramids on W<1 1 1> tips, E. Rokuta, T. Itagaki, D. Miura, T. Moriyama, T. Ishikawa, B.-L. Cho, T.Y. Fu, T.T. Tsong and C. Oshima 251 (2005) 205

Field emission arrays

- Effect of ageing process on performance of molybdenum field emission arrays, X. Li, C. Yang, J. Feng, J. Cai, G. Bai, M. Ding, F. Zhang and F. Liao 251 (2005) 210
- Electrophoretic deposition and field emission properties of patterned carbon nanotubes, H. Zhao, H. Song, Z. Li, G. Yuan and Y. Jin 251 (2005) 242

Field emission display

- Characteristics of a cold cathode electron source combined with secondary electron emission in a FED, W. Lei, X. Zhang, X. Zhou, Z. Zhu, C. Lou and H. Zhao 251 (2005) 170
- Analysis of the transverse energy distribution of hopping electrons through a glass funnel, X. Zhang, W. Lei, M. Liu, L. Zhang, D. den Engelsen, X. Zhou and Q. Wang 251 (2005) 182

Field emission

- Electron emission and work function—Past, present and future, S. Yamaoto 251 (2005) 4
- The decline of impregnated cathodes in CRTs, D. den Engelsen and L. Tong 251 (2005) 139
- Application of vitreous and graphitic large-area carbon surfaces as field-emission cathodes, C. E. Hunt and Y. Wang 251 (2005) 159
- Analysis of the carrier concentration for field emission from $\text{Al}_x\text{Ga}_{1-x}\text{N}$, T. S. Choi and M. S. Chung 251 (2005) 191
- Field emission characteristics of oriented-AlN thin film on tungsten tip, S.L. Yue, C.Z. Gu, C.Y. Shi and C.Y. Zhi 251 (2005) 215
- Enhanced electron emission from diamond film deposited on pre-seeded Si substrate with nanosized diamond power, C.Z. Gu 251 (2005) 225

- Field emission cathodes based on milled carbon fibers, E.P. Sheshin, A.S. Baturin, K.N. Nikolskiy, R.G. Tchesov and V.B. Sharov 251 (2005) 196
- Field emission properties of diamond-like carbon films annealed at different temperatures, J.J. Li, C.Z. Gu, H.Y. Peng, H.H. Wu, W.T. Zheng and Z.S. Jin 251 (2005) 236
- Electrophoretic deposition and field emission properties of patterned carbon nanotubes, H. Zhao, H. Song, Z. Li, G. Yuan and Y. Jin 251 (2005) 242
- Synthesis and field emission properties of aluminum nitride nanocones, C. Liu, Z. Hu, Q. Wu, X. Wang, Y. Chen, W. Lin, H. Sang, S. Deng and N. Xu 251 (2005) 220
- New method to fabricate field-emission cathode of carbon nanotubes, C. Lou, X. Zhang, W. Lei and C. Qi 251 (2005) 254
- Investigations of the multi-pulsed emission characteristics of velvet, L. Xia, K. Zhang, J. Shi and L. Zhang 251 (2005) 262

Field enhancement

- Theoretical analysis of the field enhancement in a two-dimensional triple junction, M. S. Chung, T. S. Choi and B.-G. Yoon 251 (2005) 177
- Field electron emission from branched nanotubes film, B. Zeng, S. Tian and Z. Yang 251 (2005) 245

Fowler–Nordheim plot

- Electron field emission properties of carbon nanotubes-deposited flexible film, H. Ma, L. Zhang, J. Zhang, L. Zhang, N. Yao and B. Zhang 251 (2005) 258

Freeze-drying

- Study on preparation and emission properties of nano-composite W– La_2O_3 material, X. Xi, Z. Nie, W. Wang, J. Yang, S. Hao, Y. Guo and T. Zuo 251 (2005) 134

GaAs photocathode

- The variation of spectral response of transmission-type GaAs photocathode in the seal process, L. Lei, C. BenKang, D. YuJie, Q. YunSheng and G. Pin 251 (2005) 273

GaAs

- Angle-dependent XPS study of the mechanisms of “high–low temperature” activation of GaAs photocathode, X. Du and B. Chang 251 (2005) 267

Graphite

- Application of vitreous and graphitic large-area carbon surfaces as field-emission cathodes, C. E. Hunt and Y. Wang 251 (2005) 159

Heterogeneity

- Stretched exponential degradation of oxide cathodes, B. M. Weon and J. H. Je 251 (2005) 59

High current density

- High current density M-type cathodes for vacuum electron devices, J. Li, Z. Yu, W. Shao, K. Zhang, Y. Gao, H. Yuan, H. Wang, K. Huang, Q. Chen, S. Yan and S. Cai 251 (2005) 151

High emission current density

- Development of new types of oxide cathodes, X. Liao, X. Wang, Q. Zhao and M. Meng 251 (2005) 64

High field-emission current density

- Fabrication and characterization of high-current-density carbon-nanotube cold cathodes, C. Zhu, C. Lou, W. Lei and X. Zhang 251 (2005) 249

High reliability

- Development of new types of oxide cathodes, X. Liao, X. Wang, Q. Zhao and M. Meng 251 (2005) 64

Hopping electron

- Analysis of the transverse energy distribution of hopping electrons through a glass funnel, X. Zhang, W. Lei, M. Liu, L. Zhang, D. den Engelsen, X. Zhou and Q. Wang 251 (2005) 182

I-V curve

- Characteristics of scandate-impregnated cathodes with sub-micron scandia-doped matrices, H. Yuan, X. Gu, K. Pan, Y. Wang, W. Liu, K. Zhang, J. Wang, M. Zhou and J. Li 251 (2005) 106

Impregnated Ba dispenser cathodes

- Operating model for scandia doped matrix scandate cathodes, W. Liu, K. Zhang, Y. Wang, K. Pan, X. Gu, J. Wang, J. Li and M. Zhou 251 (2005) 80

Impregnated cathode

- Emission and surface characteristic of ternary alloy Ir/Re/W-coated impregnated tungsten cathodes, H. Zhang, Y. Liu, M. Zhang and Y. Li 251 (2005) 130

Insulator tunnel

- Characteristics of a cold cathode electron source combined with secondary electron emission in a FED, W. Lei, X. Zhang, X. Zhou, Z. Zhu, C. Lou and H. Zhao 251 (2005) 170

Interface compounds

- The base metal of the oxide-coated cathode, F. Poret and J.M. Roquais 251 (2005) 31

Interface

- Analytical interfacial studies of double carbonate thermionic oxide cathodes over accelerated operational life, D.K. Barber, S.N. Jenkins, M.J. Whiting and M.A. Baker 251 (2005) 42

Ion bombardment

- Life-limiting mechanisms in Ba-oxide, Ba-dispenser and Ba-Scandate cathodes, G. Gaertner and D. Barratt 251 (2005) 73

Ion radiation

- Application of vitreous and graphitic large-area carbon surfaces as field-emission cathodes, C. E. Hunt and Y. Wang 251 (2005) 159

Ion trap

- Aging process of I-cathode with magnetic ion trap, X. Zhang, W. Lei, N. Feng, J. Havekes, L. Tong and D. den Engelsen 251 (2005) 146

Ion-surface impact

- The decline of impregnated cathodes in CRTs,
D. den Engelsen and L. Tong 251 (2005) 139

Kelvin probe

- A work function study of ultra-thin alumina
formation on NiAl(1 1 0) surface, W. Song
and M. Yoshitake 251 (2005) 14

Life-test

- Analytical interfacial studies of double carbon-
ate thermionic oxide cathodes over acceler-
ated operational life, D.K. Barber, S.N.
Jenkins, M.J. Whiting and M.A. Baker 251 (2005) 42

Lifetime

- High current density M-type cathodes for vac-
uum electron devices, J. Li, Z. Yu, W.
Shao, K. Zhang, Y. Gao, H. Yuan, H.
Wang, K. Huang, Q. Chen, S. Yan and S.
Cai 251 (2005) 151

Local barrier height

- Electron emission and work function—Past,
present and future, S. Yammaoto 251 (2005) 4

Long lifetime

- Development of new types of oxide cathodes,
X. Liao, X. Wang, Q. Zhao and M. Meng 251 (2005) 64

Longevity

- Stretched exponential degradation of oxide
cathodes, B. M. Weon and J. H. Je 251 (2005) 59

Metal-dielectric-vacuum

- Theoretical analysis of the field enhancement
in a two-dimensional triple junction, M. S.
Chung, T. S. Choi and B.-G. Yoon 251 (2005) 177

Micro-pit

- Cathode units with a carbon fiber field emitter,
M. Chupina, O. Ivanov, O. Maslennikov
and E. Orekhov 251 (2005) 230

Mixed matrix cathodes

- Operating model for scandia doped matrix
scandate cathodes, W. Liu, K. Zhang, Y.
Wang, K. Pan, X. Gu, J. Wang, J. Li and M.
Zhou 251 (2005) 80

Molybdenum

- Emission efficiency optimization of RE₂O₃
doped molybdenum thermionic cathode by
application of pattern recognition method,
J. Wang, W. Liu, Y. Liu and M. Zhou 251 (2005) 89

M-type cathodes

- High current density M-type cathodes for vac-
uum electron devices, J. Li, Z. Yu, W.
Shao, K. Zhang, Y. Gao, H. Yuan, H.
Wang, K. Huang, Q. Chen, S. Yan and S.
Cai 251 (2005) 151

Multi beam klystrons

- High current density M-type cathodes for vac-
uum electron devices, J. Li, Z. Yu, W.
Shao, K. Zhang, Y. Gao, H. Yuan, H. Wang,
K. Huang, Q. Chen, S. Yan and S. Cai 251 (2005) 151

Multi-pulsed diode

- Investigations of the multi-pulsed emission
characteristics of velvet, L. Xia, K. Zhang,
J. Shi and L. Zhang 251 (2005) 262

Nano-composite

- Study on preparation and emission properties
of nano-composite W-La₂O₃ material, X.
Xi, Z. Nie, W. Wang, J. Yang, S. Hao, Y.
Guo and T. Zuo 251 (2005) 134

Nano-sized scandia

- Characteristics of scandate-impregnated cath-
odes with sub-micron scandia-doped matri-
ces, H. Yuan, X. Gu, K. Pan, Y. Wang, W.
Liu, K. Zhang, J. Wang, M. Zhou and J. Li 251 (2005) 106

Ni catalyst

- Field electron emission from branched nan-
otubes film, B. Zeng, S. Tian and Z. Yang 251 (2005) 245

NiAl(1 1 0)

- A work function study of ultra-thin alumina formation on NiAl(1 1 0) surface, W. Song and M. Yoshitake 251 (2005) 14

Nickel alloys

- The base metal of the oxide-coated cathode, F. Poret and J.M. Roquais 251 (2005) 31

Orientation

- Field emission characteristics of oriented-AlN thin film on tungsten tip, S.L. Yue, C.Z. Gu, C.Y. Shi and C.Y. Zhi 251 (2005) 215

Os-W alloy

- A new dispenser cathode with dual-layer, Y. Li, H. Zhang, P. Liu and M. Zhang 251 (2005) 126

Os-W/Re

- A new dispenser cathode with dual-layer, Y. Li, H. Zhang, P. Liu and M. Zhang 251 (2005) 126

Oxide cathode

- Hundred years anniversary of the oxide cathode—A historical review, G. Gaertner and D. den Engelsen 251 (2005) 24
 Model of dopant action in oxide cathodes, D. den Engelsen and G. Gaertner 251 (2005) 50
 Stretched exponential degradation of oxide cathodes, B. M. Weon and J. H. Je 251 (2005) 59
 Development of new types of oxide cathodes, X. Liao, X. Wang, Q. Zhao and M. Meng 251 (2005) 64
 Life-limiting mechanisms in Ba-oxide, Ba-dispenser and Ba-Scandate cathodes, G. Gaertner and D. Barratt 251 (2005) 73

Oxide-coated cathode

- The base metal of the oxide-coated cathode, F. Poret and J.M. Roquais 251 (2005) 31

Particle-in-cell

- Two-dimensional Child–Langmuir law of planar diode with finite-radius emitter, Y. Li, H. Wang, C. Liu and J. Sun 251 (2005) 19

Pattern recognition method

- Emission efficiency optimization of RE₂O₃ doped molybdenum thermionic cathode by application of pattern recognition method, J. Wang, W. Liu, Y. Liu and M. Zhou 251 (2005) 89

Photocathode

- Angle-dependent XPS study of the mechanisms of “high–low temperature” activation of GaAs photocathode, X. Du and B. Chang 251 (2005) 267

Planar diode

- Two-dimensional Child–Langmuir law of planar diode with finite-radius emitter, Y. Li, H. Wang, C. Liu and J. Sun 251 (2005) 19

Poisoning

- Model of dopant action in oxide cathodes, D. den Engelsen and G. Gaertner 251 (2005) 50

Polyimide

- Electron field emission properties of carbon nanotubes-deposited flexible film, H. Ma, L. Zhang, J. Zhang, L. Zhang, N. Yao and B. Zhang 251 (2005) 258

Pore size

- Correlation of cathode parameters of high power grid tubes with material characteristics of cathode-grid units, I. P. Melnikova, I. V. Polyakov and D. A. Usanov 251 (2005) 120

Powder “activity”

- Correlation of cathode parameters of high power grid tubes with material characteristics of cathode-grid units, I. P. Melnikova, I. V. Polyakov and D. A. Usanov 251 (2005) 120

Powder metallurgy

- New method to fabricate field-emission cathode of carbon nanotubes, C. Lou, X. Zhang, W. Lei and C. Qi 251 (2005) 254

Pulsed laser deposition

- Preparation and "in situ" analysis of La coated Mo cathodes, S. Hao, Z. Nie, J. Yang and X. Xi 251 (2005) 97

Rare earth oxide (RE_2O_3)

- Emission efficiency optimization of RE_2O_3 doped molybdenum thermionic cathode by application of pattern recognition method, J. Wang, W. Liu, Y. Liu and M. Zhou 251 (2005) 89

Relativistic regime

- Two-dimensional Child–Langmuir law of planar diode with finite-radius emitter, Y. Li, H. Wang, C. Liu and J. Sun 251 (2005) 19

Reservoir cathodes

- Weld techniques for reservoir cathodes, B. K. Vancil and E. G. Wintucky 251 (2005) 101

Reservoir oxide cathode

- An improved reservoir oxide cathode, X. Wang, X. Liao, J. Luo and Q. Zhao 251 (2005) 69

Residual gas

- Aging process of I-cathode with magnetic ion trap, X. Zhang, W. Lei, N. Feng, J. Havekes, L. Tong and D. den Engelsen 251 (2005) 146

Resistance to poisoning

- An improved reservoir oxide cathode, X. Wang, X. Liao, J. Luo and Q. Zhao 251 (2005) 69

Reticulated vitreous carbon (RVC)

- Application of vitreous and graphitic large-area carbon surfaces as field-emission cathodes, C. E. Hunt and Y. Wang 251 (2005) 159

Scandate cathodes

- Life-limiting mechanisms in Ba-oxide, Ba-dispenser and Ba-Scandate cathodes, G. Gaertner and D. Barratt 251 (2005) 73
- Operating model for scandia doped matrix scandate cathodes, W. Liu, K. Zhang, Y. Wang, K. Pan, X. Gu, J. Wang, J. Li and M. Zhou 251 (2005) 80

- Scandate cathode for TWT, W. Shuguang 251 (2005) 114

Scandate-impregnated cathode

- Characteristics of scandate-impregnated cathodes with sub-micron scandia-doped matrices, H. Yuan, X. Gu, K. Pan, Y. Wang, W. Liu, K. Zhang, J. Wang, M. Zhou and J. Li 251 (2005) 106

Schottky barrier

- Analysis of the carrier concentration for field emission from $Al_xGa_{1-x}N$, T. S. Choi and M. S. Chung 251 (2005) 191

Screen-printing

- Field emission cathodes based on milled carbon fibers, E.P. Sheshin, A.S. Baturin, K.N. Nikolskiy, R.G. Tchesov and V.B. Sharov 251 (2005) 196

Secondary electron emission

- Characteristics of a cold cathode electron source combined with secondary electron emission in a FED, W. Lei, X. Zhang, X. Zhou, Z. Zhu, C. Lou and H. Zhao 251 (2005) 170

Seeded substrate

- Enhanced electron emission from diamond film deposited on pre-seeded Si substrate with nanosized diamond powder, C.Z. Gu 251 (2005) 225

Self-repairing function

- Atomic-scale field emitter with self-repairable function and thermodynamically stable structure: FEM study on Pd-covered nanopillars on $W<1\ 1\ 1>$ tips, E. Rokuta, T. Itagaki, D. Miura, T. Moriyama, T. Ishikawa, B.-L. Cho, T.Y. Fu, T.T. Tsong and C. Oshima 251 (2005) 205

SEM

- Analytical interfacial studies of double carbonate thermionic oxide cathodes over accelerated operational life, D.K. Barber, S.N. Jenkins, M.J. Whiting and M.A. Baker 251 (2005) 42

Semi-conductor impurity levels

- Model of dopant action in oxide cathodes, D. den Engelsen and G. Gaertner 251 (2005) 50

Single-atom tips

- Atomic-scale field emitter with self-repairable function and thermodynamically stable structure: FEM study on Pd-covered nanopyrramids on W<1 1 1> tips, E. Rokuta, T. Itagaki, D. Miura, T. Moriyama, T. Ishikawa, B.-L. Cho, T.Y. Fu, T.T. Tsong and C. Oshima 251 (2005) 205

Space charge effect

- Synthesis and field emission properties of aluminum nitride nanocones, C. Liu, Z. Hu, Q. Wu, X. Wang, Y. Chen, W. Lin, H. Sang, S. Deng and N. Xu 251 (2005) 220

Spark plasma sintering

- Study on preparation and emission properties of nano-composite W-La₂O₃ material, X. Xi, Z. Nie, W. Wang, J. Yang, S. Hao, Y. Guo and T. Zuo 251 (2005) 134

Spectral matching factor

- The variation of spectral response of transmission-type GaAs photocathode in the seal process, L. Lei, C. BenKang, D. YuJie, Q. YunSheng and G. Pin 251 (2005) 273

Spectral response

- The variation of spectral response of transmission-type GaAs photocathode in the seal process, L. Lei, C. BenKang, D. YuJie, Q. YunSheng and G. Pin 251 (2005) 273

Spindt tip

- Effect of ageing process on performance of molybdenum field emission arrays, X. Li, C. Yang, J. Feng, J. Cai, G. Bai, M. Ding, F. Zhang and F. Liao 251 (2005) 210

Spindt-type cathodes

- Fabrications of Spindt-type cathodes with aligned carbon nanotube emitters, M. Q. Ding, X. Li, G. Bai, J. J. Feng, F. Zhang and F. Liao 251 (2005) 201

Stretched exponential

- Stretched exponential degradation of oxide cathodes, B. M. Weon and J. H. Je 251 (2005) 59

Sub-micron structure matrix

- Characteristics of scandate-impregnated cathodes with sub-micron scandia-doped matrices, H. Yuan, X. Gu, K. Pan, Y. Wang, W. Liu, K. Zhang, J. Wang, M. Zhou and J. Li 251 (2005) 106

Sub-micron structure

- Operating model for scandia doped matrix scandate cathodes, W. Liu, K. Zhang, Y. Wang, K. Pan, X. Gu, J. Wang, J. Li and M. Zhou 251 (2005) 80

Surface

- Preparation and "in situ" analysis of La coated Mo cathodes, S. Hao, Z. Nie, J. Yang and X. Xi 251 (2005) 97

Surface analysis

- Operating model for scandia doped matrix scandate cathodes, W. Liu, K. Zhang, Y. Wang, K. Pan, X. Gu, J. Wang, J. Li and M. Zhou 251 (2005) 80

Surface properties

- Study on preparation and emission properties of nano-composite W-La₂O₃ material, X. Xi, Z. Nie, W. Wang, J. Yang, S. Hao, Y. Guo and T. Zuo 251 (2005) 134

TEM

- Analytical interfacial studies of double carbonate thermionic oxide cathodes over accelerated operational life, D.K. Barber, S.N. Jenkins, M.J. Whiting and M.A. Baker 251 (2005) 42

Thermionic cathodes

- Weld techniques for reservoir cathodes, B. K. Vancil and E. G. Wintucky 251 (2005) 101

Thermionic electron emission

- Emission and surface characteristic of ternary alloy Ir/Re/W-coated impregnated tungsten cathodes, H. Zhang, Y. Liu, M. Zhang and Y. Li 251 (2005) 130

Thermionic emission

- Electron emission and work function—Past, present and future, S. Yammaoto 251 (2005) 4
- Hundred years anniversary of the oxide cathode—A historical review, G. Gaertner and D. den Engelsen 251 (2005) 24
- Life-limiting mechanisms in Ba-oxide, Ba-dispenser and Ba-Scandate cathodes, G. Gaertner and D. Barratt 251 (2005) 73
- Emission efficiency optimization of RE_2O_3 doped molybdenum thermionic cathode by application of pattern recognition method, J. Wang, W. Liu, Y. Liu and M. Zhou 251 (2005) 89
- Preparation and "in situ" analysis of La coated Mo cathodes, S. Hao, Z. Nie, J. Yang and X. Xi 251 (2005) 97
- Characteristics of scandate-impregnated cathodes with sub-micron scandia-doped matrices, H. Yuan, X. Gu, K. Pan, Y. Wang, W. Liu, K. Zhang, J. Wang, M. Zhou and J. Li 251 (2005) 106
- Study on preparation and emission properties of nano-composite $\text{W-La}_2\text{O}_3$ material, X. Xi, Z. Nie, W. Wang, J. Yang, S. Hao, Y. Guo and T. Zuo 251 (2005) 134

Thermochemistry

- The base metal of the oxide-coated cathode, F. Poret and J.M. Roquaïs 251 (2005) 31

Thermodynamically stable structures

- Atomic-scale field emitter with self-repairable function and thermodynamically stable structure: FEM study on Pd-covered nanopylramids on $\text{W}<1\ 1\ 1>$ tips, E. Rokuta, T. Itagaki, D. Miura, T. Moriyama,

- T. Ishikawa, B.-L. Cho, T.Y. Fu, T.T. Tsong and C. Oshima 251 (2005) 205

Thoriated tungsten

- Emission efficiency optimization of RE_2O_3 doped molybdenum thermionic cathode by application of pattern recognition method, J. Wang, W. Liu, Y. Liu and M. Zhou 251 (2005) 89

Transverse energy distribution

- Analysis of the transverse energy distribution of hopping electrons through a glass funnel, X. Zhang, W. Lei, M. Liu, L. Zhang, D. den Engelsen, X. Zhou and Q. Wang 251 (2005) 182

Traveling wave tube (TWT)

- Scandate cathode for TWT, W. Shuguang 251 (2005) 114

Trimer tips

- Atomic-scale field emitter with self-repairable function and thermodynamically stable structure: FEM study on Pd-covered nanopylramids on $\text{W}<1\ 1\ 1>$ tips, E. Rokuta, T. Itagaki, D. Miura, T. Moriyama, T. Ishikawa, B.-L. Cho, T.Y. Fu, T.T. Tsong and C. Oshima 251 (2005) 205

Triode structure

- Characteristics of a cold cathode electron source combined with secondary electron emission in a FED, W. Lei, X. Zhang, X. Zhou, Z. Zhu, C. Lou and H. Zhao 251 (2005) 170

Triple junction

- Theoretical analysis of the field enhancement in a two-dimensional triple junction, M. S. Chung, T. S. Choi and B.-G. Yoon 251 (2005) 177

Two-sectional Fowler–Nordheim plot

- Synthesis and field emission properties of aluminum nitride nanocones, C. Liu, Z. Hu, Q. Wu, X. Wang, Y. Chen, W. Lin, H. Sang, S. Deng and N. Xu 251 (2005) 220

UPS

- A work function study of ultra-thin alumina formation on NiAl(1 1 0) surface, W. Song and M. Yoshitake 251 (2005) 14

Vacuum tube

- Hundred years anniversary of the oxide cathode—A historical review, G. Gaertner and D. den Engelsen 251 (2005) 24

Velvet

- Investigations of the multi-pulsed emission characteristics of velvet, L. Xia, K. Zhang, J. Shi and L. Zhang 251 (2005) 262

Visual range

- The variation of spectral response of transmission-type GaAs photocathode in the seal process, L. Lei, C. BenKang, D. YuJie, Q. YunSheng and G. Pin 251 (2005) 273

Work function

- A work function study of ultra-thin alumina formation on NiAl(1 1 0) surface, W. Song and M. Yoshitake 251 (2005) 14
Electron emission and work function—Past, present and future, S. Yammaoto 251 (2005) 4
Scandate cathode for TWT, W. Shuguang 251 (2005) 114
